Github: leothatguy | Lagos, Nigeria · Remote

Summary

Frontend focused Fullstack Engineer with 4+ years of experience building, shipping, and maintaining production web applications using React, Next.js, and TypeScript. Experienced in owning frontend systems end-to-end, making architectural decisions, and iterating on real products over time. Strong focus on maintainability, accessibility, and practical problem-solving in growing codebases.

Work Experience

Fullstack Engineer

HNG Internship & Emerj · Remote

October 2025 – Present

- Built and maintained full-stack features such as fees management, timetable systems and others across frontend and backend. for an education management platform (SchoolBase),
 - Developed responsive UI, designed and integrated RESTful APIs to support multi-role workflows, managed DevOps processes across development and production environments.
 - Fixed bugs, improved performance, and refactored code to enhance scalability and user experience, and contributed to feature planning and technical decisions while collaborating with a cross-functional team.
-

Frontend Engineer

KojaJobs · Remote

October 2024 – January 2026

- Owned the frontend architecture of KojaJobs, a production job discovery platform, using Next.js and TypeScript.
- Designed and implemented reusable UI components and application layouts with a focus on scalability and long-term maintainability.
- Integrated backend APIs to support job listings, search, and dynamic content updates, handling client-side state and edge cases.
- Served as the primary decision-maker for frontend-related tradeoffs between delivery speed and code quality.

Frontend Engineer

TheCOZM UK · Remote

January 2025 – April 2025

- Developed and maintained frontend components for internal dashboards and operational tools using React, TypeScript, and Tailwind CSS.
 - Extended existing user flows and UI designs based on evolving client requirements, working from Figma designs.
 - Built interactive data visualizations and reporting views using Power BI to support internal decision-making.
 - Collaborated with stakeholders during feature reviews, testing cycles, and iterative improvements.
-

Frontend Engineer

BMJ Luxe Mobility · Remote

August 2025 – December 2025

- Designed and developed the core frontend of a luxury mobility booking platform using Next.js and Tailwind CSS.
 - Implemented end-to-end booking flows, translating complex service options into intuitive user experiences.
 - Built interactive concierge features and UI animations using Framer Motion to improve engagement and perceived performance.
 - Delivered a production-ready, responsive frontend under real delivery timelines.
-

Frontend Engineer (Freelance / Contract)

Remote

June 2022 – Present

- Delivered production frontend solutions for startups and small businesses using React, Next.js, Vue.js, and TypeScript.
- Built reusable UI components and lightweight design systems to improve consistency across projects.
- Integrated REST and GraphQL APIs, managing client-side state, async data flows, and error handling.
- Maintained shipped applications, resolving bugs and refining UI performance over time.

Additional Experience

Frontend Engineer -> Trip-Picker · On-site

Sept 2024 – Oct 2024

- Built internal admin dashboards for trip management and revenue reporting using Next.js and Tailwind CSS.

Frontend Engineer -> Proline Media Agency · Remote

Aug 2024

- Developed responsive and accessible marketing and e-commerce websites using React and TypeScript.

Full-Stack Developer Intern -> HNG Internship (11, 12, 13) · Remote

- Contributed frontend features to multiple team projects using React, Next.js, and TypeScript.
 - Collaborated with cross-functional teams in fast-paced delivery environments.
-

Education

B.Eng, Civil Engineering

University of Benin · 2019 – 2024

Technical Skills

Frontend:

React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vue.js, Framer Motion, shadcn/ui

Backend & APIs:

REST, GraphQL, Firebase, PostgreSQL, NestJS

Quality & Tooling:

Accessibility (WCAG), Design Systems, Storybook, Jest, Git

DevOps:

Docker, CI/CD pipelines, Linux, Nginx, Vercel

Design & Product:

Figma, Responsive Design, UI/UX Collaboration

Certifications & Programs

- HNG i11 Frontend Finalist
- HNG i12 Frontend Finalist
- HNG i13 Frontend, Backend & DevOps Finalist
